

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

I don't think it would be fair for people who use the phone system less to subsidize people who frequently call long distance and or businesses! Consider the highway system the ones paying at the toll booth are the ones who use it do the same for the USF.

Keep the USF Fair!

Kevin T. Savard 147 State Street Berlin, NH 03570

Sincerely,

Kevin Savard
